Subject: Letter of Support for Dr. Theodore Anderson

To: Whom It May Concern

1. I fully support Dr. Ted Anderson's work in the science and technology of plasma physics and the direct application of his vast experience and expertise to the development of directed energy weapons (DEW). I am convinced that Dr. Anderson's pursuit of this crucial area will reap great rewards in warfighting capabilities for our military Services. My view of Dr. Anderson's contributions are based on my background of multiple assignments during my military active duty where I worked many programs involving DEW technology.
2. Dr. Anderson's work focuses on his rare ability to push the state-of-the-art in the research and application of plasma physics. He is the recognized authority in this field, having authored documents that are the references used throughout the government and commercial communities to advance a broad range of research, development, and acquisition programs.
3. Application of plasma physics science to DEW technology requirements promises remarkable advances in combat capabilities that are essential to our national defense. Dr. Anderson is the right person at this critical point in time to make these capabilities a reality.

Sincerely,

G. D. Blackmore, Colonel, USAF (Ret)  
President
